

KASINS OY

YOUR PARTNER IN STONE PROCESSING

**BRIDGESAW
FOX 800-1000**

FOX is a middle size multifunctional stonesaw, which can effectively be used for many variable tasks is stoneprocessing. It is optimal for sawing building- and furnishingstone like stairs-, windowsills-, kitchentops and other tabletops as well as for processing tombstones, monumental- and environmentalstone, etc. Higher level of automation gives additional effectivity when sawing for example facade-, floor-, etc. stoneplates.

BRIDGESAW FOX 800 – 1000

- Fullfills the specific, individual needs of different stoneprocessors
- Suitable for every stonematerial
- Fullfeed- or stepcutting (with throughcutting automation on/off), even when blade tilted (vertical support 0- 45 degr.)
- Blade diameter max 1000mm, rotationspeed according the blade dia. and stonematerial
- 1-5 different sawing widths with 1-99 repetitions for each can be programmed
- Alternative levels of automation and other features can be added as options
- Reliable effectivity with multiple features for long in the future- with a modest investmentlevel

Technical data

width	5 400 mm (sawing length 3 500mm)
raillength	5 100 mm (bridge movement 3 500 mm)
height	3 000 mm
blade dia.	800 mm 1 000 mm
max. cuttingdepth	310 mm 395 mm
mainmotor	15 kW 18 kW
tilting vertical support	0 – 45° (option)
TURNTABLE- KTT	(option)
length	3 000 mm
width	1 700 mm
height	700 – 800 mm
loading capacity	3,0 t
available with manual function as well as motorized-automatcal version	

Kasins Oy is a Finnish specialist in stoneprocessing machinery. Kasins machinery is built for demanding stoneprocessing. The solid solid frames of the machinery, the precise positionings (tolerances)and the luxurious class of end- surface of finished products are factors highly respected by stoneprocessors.

Our basic machine- program offer a numerous, flexible possibilities to optimize the entire production to extreme effectiveness according each specific Customer. We also deliver entire specialmachines and entire productionlines for example building, monument- etc. purposes.
